

THAT WHICH IS CLAIMED IS:

1. A golf club head for an iron-type golf club comprising:  
a golf head portion having a front face, a sole, a toe, and a heel portion;  
and,  
an aperture defined in a front face of a heel portion, the aperture having  
an axis substantially perpendicular to the heel face surface.
2. A golf head according to claim 1 wherein said club head further comprises  
a hosel having a first end and a second end, a first end of the hosel reversibly  
engaging said aperture in a second end of said hosel adapted for receiving a  
shaft.
3. The golf club head according to claim 1 wherein said front face defines a  
first planar surface and said heel portion defines a heel face having a  
substantially planar portion, said heel face and said front face establishing  
therebetween a lie angle.
4. The golf club head according to claim 1 wherein said heel face further  
defines a wedge-shaped member, said wedge-shaped member having a bore  
therethrough, said bore in alignment with said aperture, said bore and said  
aperture adapted for receiving a first end of a hosel.
5. A golf club comprising a club head having a front face, a sole, a toe, and a  
heel, said heel defining an aperture extending through at least one of a front face  
or a rear face of said heel, said aperture adapted for receiving a hosel therein.
6. The golf club according to claim 5 wherein said aperture extends from a  
front surface of said heel.
7. The golf club according to claim 5 wherein said aperture extends from a  
rear surface of said heel.

8. The golf club according to claim 5 wherein an angle of a hosel inserted within the aperture defined by said heel establishes a loft angle of said club.
9. The golf club according to claim 5 wherein said front face of said heel defines a heel face plane which intersects a plane defined by a strike face of said club head.
10. A golf club comprising:
  - a club head having a front face, a sole, a toe, and a heel, said heel defining a bore extending into at least one of a front surface or a rear surface of said heel; and,
  - an angled hosel having a first end inserted into said bore and a second end attached to a shaft.
11. A golf club according to claim 10 wherein said heel has a front heel face defining a plane which is coplanar to a plane defined by said front face of said club.
12. A golf club according to claim 10 wherein said heel has a front heel face defining a plane which is parallel to a plane defined by said front face of said golf club head.
13. A golf club according to claim 11 wherein said heel has a front heel face which defines a plane which intersects a plane defined by said front face of said club.
14. A golf club according to claim 11 wherein said bore is perpendicular to at least one of said front surface or said rear surface of said heel.

15. A golf club according to claim 11 wherein said bore defines a non-perpendicular angle to said at least one of said front surface or said rear surface of said heel.
